

Date: 09.08.2024

Define an Employee class with necessary fields like id, name, age, basicpay, gender, deptName, and city. Write a Java program that generates payroll for an employee using the formula given below:

- $\text{Net Salary} = \text{Gross Salary} - \text{Income Tax}$
- $\text{Gross Salary} = \text{Basic pay} + \text{HRA} + \text{DA}$
- $\text{HRA} = 10\% \text{ of Basic pay}$
- $\text{DA} = 30\% \text{ of Basic pay}$
- $\text{Income Tax} = 10\% \text{ of Gross Salary if it exceeds 1 lakhs.}$

Print the complete employee payroll details as given below:

Employee Details

Name: C.Kumar

Id: HR001

Age: 25

Gender: M

Dept: HR

BasicPay: 100000

HRA: 10000

DA: 30000

Gross Salary: 140000

Income tax:14000

Net Salary: 126000
